

The new HEINE DERManager.

One piece of software. Two operating options.

In simple terms, the dermatoscope and iPhone* are used to capture the images, and the computer is used for the observation in detail.

Both devices can naturally be used to do much more, but here is an overview:

[Download the DERManager app](#)

[Access the DERManager web](#)

Function/Feature	DERManager app	DERManager web
Access patients	✓	✓
Create new patients	✓	✓
